

Piranha is a fully autonomous cleaning vessel that quickly & quietly skims for surface debris in your marina. Every day it collects unsightly floating bags, plastic bottles, cigarette butts, dead fish, seaweed, Styrofoam, wood, and oil floating in your marina.

Piranha comes equipped with our DataPod which gives you real time water quality readings, so you'll always be aware of any toxins suddenly showing up your water.

The cleanest analogy is that we have created a Roomba™ for Your Marina

KEY FEATURES

- ◆ Full self-driving autonomy
- ◆ 8-hour battery life
- ◆ Collects up to 100 lbs. per mission
- ◆ Easy-to-empty mesh bag
- ◆ Pivoting arm for easy access to debris
- ◆ 1 minute or less to unload.
- ◆ Durable, rust-free aluminum frame and shell
- ◆ Superyacht Design aesthetic
- ◆ HDPE Pontoon floats
- ◆ Made in the USA

KEY BENEFITS

- ✓ Labor cost reduction
- ✓ Cleaner marina environment
- ✓ Happier clients
- ✓ Exceptional PR
- ✓ Satisfaction guaranteed
- ✓ 12-month parts and labor warranty
- ✓ Safer Waters

USER APP

See all your devices in one place on our app! Access it from your desktop or mobile device.

Our app allows you to remotely operate autonomous missions, view vessel and water data, and manage billing and team access from anywhere in the world!
